Finding the evidence:
Google & beyond: Course Outline

Aimed at: All health professionals who wish to gain skills in searching
                       online resources for information to support their work, practice
                       or professional development.

Duration: 2 hours

Pre-requisites: Basic IT skills and the ability to use a mouse. Participants
                       should be familiar with the Internet and confident in using the
                       keyboard.

Course Outline: For further information see our course outline below.

KSF Dimensions: This training course supports KSF dimensions:
                       Core 5 (1d, 2e)
                       IK2 (2a, 2b, 2c)
                       IK3 (1b, 1c, 1d, 3b, 3c)

By the end of the session participants should be able to:

- Understand and use the search features of Google and other search engines

- Search effectively to retrieve relevant information and evidence

- Use a range of online resources to access research information, grey
  literature, images and statistics
